V-LASESER MARKING

DATALOGIC AUTOMATION

V-LASE SERIES

The V-Lase is a DPSS air-cooled laser marking source @1064nm, available in 10, 15 and 20W, that operates on the V-Lase platform. The excellent beam quality, necessary for marking a broad range of materials, is one of the winning characteristics of the V-Lase laser sources. Best results are obtained on steel, titanium, aluminium (bare, anodized or coated) as well as on plastics such as ABS, PP, PES, PET, PVC and many others.

FEATURES & BENEFITS

- · Extremely easy to integrate and configure
- High reliability
- Excellent beam quality for superior industrial marking applications
- High peak power and short pulse width for excellent marking on a broad range of materials
- Integrated state-of-the art marking kit including user friendly marking software
- Advanced diagnostic & easy connectivity

V-LASE PLATFORM

- The V-Lase platform derives from the long experience in the production of high performance and high quality DPSS laser sources. The V-Lase sources and markers @1064nm use the state-of-theart End Pumped Coupling Technology, which represents the leading-edge solution in the field of laser sources.
- The platform is characterized by a standard compact case, continuous and precise power control and low power consumption. Moreover, special attention has been dedicated to the safety aspects. The proprietary end-pumped architecture using a TE cooled diode laser pump with unmatched MTBF, assures the reliability and availability of the system.
- The V-Lase platform offers lasers with excellent beam quality, high peak power and short pulse width. The operator is able to precisely tune the power and pulse repetition rate. Very high brilliance in the laser spot, at longer focal lengths, makes the V-Lase platform ideal for marking a broad range of materials, even with large marking fields.
- Designed for very demanding 24/7 processes, the V-Lase platform offers unparalleled performance and represents the ideal solution for both direct part marking and label marking in every market segment including automotive, solar & electronics, packaging, as well as in medical surgical tools marking and other applications.
- The V-Lase platform significantly extends the possibility of connection between the laser source and the operating system. The communication with the system is enabled by RS232. In addition, the V-Lase platform also has an I/O for the connection of the TTL and analogue signals. Ethernet connection is available for monitoring.

APPLICATIONS

This product series has been developed to satisfy to requirements of the

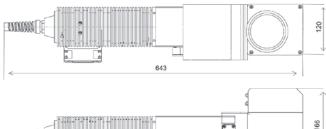

following reference applications:Plastic and metal marking in automotive, solar & electronics and healthcare industries, among the others.

CONTROL UNIT (RACK)

MARKING KIT

The marking kit allows system integrators to easily interact with the laser marking system. The kit consists of two components: a PCI electronic board (iMarkPCI) that provides control signals to the laser and a powerful software (Lighter) that provides a graphical user interface to create marking layouts and automate the laser marking process through integration with legacy systems. The Lighter graphical editor creates and edits text strings, shapes, barcodes (e.g.128, EAN/UPČ, 2/5, 3/9, GS1-128, RSS) and matrix codes (Datamatrix, QR codes,micro QR codes). It can also import logos in vectorial and raster formats.

Lighter marking kit guarantees key advances in marking software functions and applications such as marking on fly, array marking, grey tones marking, mechanical axis control, rotating axis control and others. Lighter is scriptable: this means that it can be easily integrated with legacy systems through a wide range of combinations of transmission media, protocols and architectures (master/slave, client/server, ...). Lighter is extensible: its scripting features can be extended through custom-developed plug-ins to deal with specific integration-related issues (custom components or protocols, patent protected algorithms, etc.).

V-LASE ACCESSORIES

The following accessories are available to simplify installation and optimize product performances:

- Power Supply
- Support for fitting to standard19" rack
- Ethernet interface module for monitoring
- Lens adapters
- F-Thetas

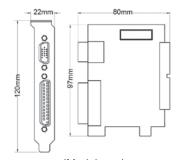

DATALOGIC AUTOMATION Headquarters

Via Lavino, 265 40050 Monte San Pietro Bologna - Italy Tel. +39 051/6765611 Fax +39 051/6759324 info.automation.it@datalogic.com

TECHNICAL SPECIFICATIONS IMARK MARKING KIT

User interface	Languages	English, Italian, German, Spanish, French, Polish, Japanese, Traditional Chinese, Simplified Chinese, Korean				
PC	Supported OS	Windows 7 / Vista / XP				
compatibility	Board slot	PCI Express (1x)				
Galvo performance	Repeatability	< 10um short term positioning accuracy				
	Precision	< 50um galvo positioning precision				
	Long term drift	< 100um long term positioning drift				
	Speed	Up to 10.000 mm/s				
Character type	Font	Original single line, True Type, Open Type, Type1, Type42				
	Languages	European, Asian, Arabic, Cyrillic and Hindi languages supported				
	Text type	Fixed text, date and time, serial number, batch code, fully customizable code				
Code type	Barcode	2to5, Code39, Code128, UPC, EAN (GS1 ready)				
	Stacked	PDF417, Code16K, RSS Family				
	Matrixcode	Datamatrix, QRcode, microQR				
Logo image	Types	HPGL, PLT, DXF, DWG, BMP, JPG, TIF, GIF, PNG				
Integration	Marking capabilities	Standing, Rotary axis, On the fly (marking in motion)				
	Mechanical Axis	Up to 4 mechanical axis driving capabilities (stepper motor)				
	I/O	Up to 16 digital inputs and 16 digital output fully programmable				
	Encoder	Dual line high resolution encoder input (on the fly option)

The company endeavours to continuously improve and renew its products; for this reason the technical data and contents of this catalogue may undergo variations without prior notice. For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

All laser sources described in this product guide are Class 4 laser sources. Laser interaction with organic or inorganic material can cause TOXIC FUMES/ PARTICLES. The OEM laser components described in this product guide is for sale solely to qualified manufacturers, who shall provide interlocks, indicators and other appropriate safety features in full compliance with applicable national and local regulations.
